ABOUT ME

I'm an intermediate IT developer with skills in software development. I have experience with C, C++, and I've worked on few academic projects. I enjoy solving problems and learning new technologies. I'm looking for a role at a tech company where I can continue to grow and contribute to exciting projects.

EDUCATION

- Bachelor of Technology Information Technology

Government College of Engineering, Karad
[Shivaji University of Maharashtra]

Graduation: 2027 [Expected]

Relevant Coursework-

Data Structure and Algorithm [DSA], Artificial Intelligence and Machine Learning [AIML], Artificial Intelligence of Things [AIOT].

AWARDS

- Science Exhibition Competition : Secured Third Place

PROJECTS

- Computer Vision for Gesture Detection

Developed a gesture detection system using computer vision techniques. Utilized Python libraries such as OpenCV for image processing and TensorFlow for machine learning models. The system accurately identifies and interprets hand gestures in real-time, enabling intuitive human-computer interaction for various applications.

- Time and Money Management App

Currently working on a Time and Money Management App using C, incorporating Data Structures and Algorithms (DSAs) like arrays, linked lists, hash tables, and sorting algorithms. The app facilitates budget tracking, expense management, and time allocation for effective personal finance and productivity management.
